Description

Coming from a hybridization of Hosta Bottom line.

Height : about 25/35 cm.

Width : about 45/65 cm.

Dimensions of the leaves : about 22 x 16 cm.

This variety has large oval yellow/green leaves with very corrugated sides.

Another particularity : the base of the petioles has red tones. The corrugated aspect and the texture of the bumpy leaf give much charm to this variety.

Lavender color flowers in summer.

Big rhizome delivered in a 1 liter plastic pot.
